

Pitch Deck!

# Problems!

## In canteen :-

- Long queues are unbearable in canteen.
- Wait for long time to get food ready!
- Sometimes wrong order is prepared instead of their order.
- Managers are not able to ensure that customer are paying them.
- Owner of the canteen does not get exact figure of commodities sold.

## In local market!

- There is no campus ZOMATO or SWIGGY for local shops in many campus.
- They don't know what exactly nearby people need
- People don't get what exactly local shops have best for them.

# Solution

A centralized platform for an entire campus with a maintained database, curated list of food items of all local shops in & nearby campus!

## Our App

Consist of menu and shop owners can add & reject orders!

## Delivery System

# Product

A web service with resource management and QnA platform

All time app

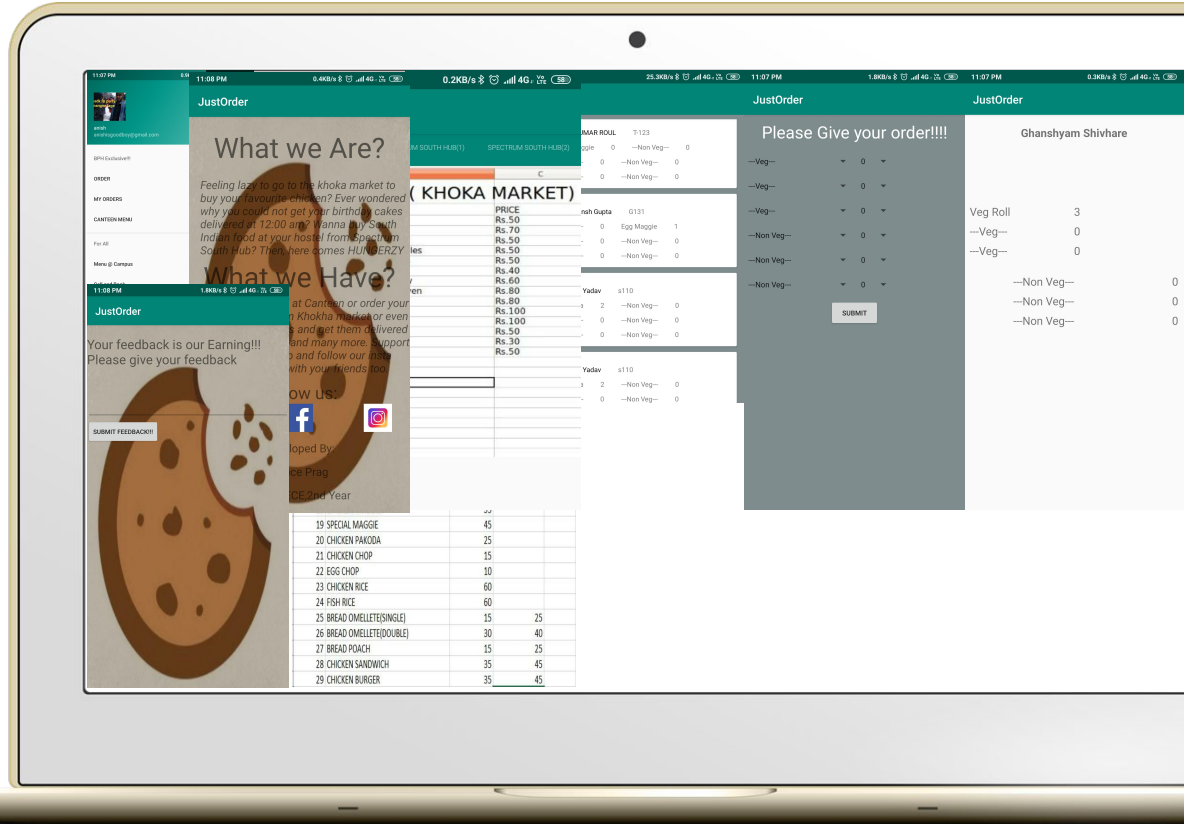

Time  
Saving

Order from  
local shops!

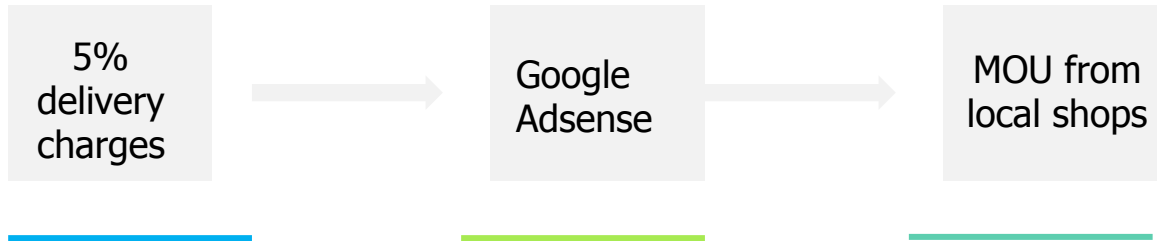

Delivery

# Business Model

Income

(Within a campus)

# Competition:

## **Our Company**

---

- Platform grows as time progresses, assimilating more local shops nearby.
- Saves time (as time is money) take your order only when food is ready
- Get recommendations from what other people have to say on the item they ordered.
- Local shops will get to know what local people loves most.
- Local shops revenue will get increase as there will be more to know about there shops!

## **Zomato and similar platforms**

---

- They generally do not deliver to colleges which are located in remote areas.
- Mainly available for major cities.
- No recommendation of what are good is available in the campus.

# Future Plans

- Introduce Payment centralized payment system for campus.
- Expand in other colleges across india
- Introducing our app to locals of small cities.
